Jishnu V

Software Engineer

jishnukyr@gmail.com | +91 9645792624 | Kochi, India

Software Developer with 4 years of hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Fluent in Angular. Seeking to leverage broad development experience and hands- on technical expertise in a challenging role as a Software Developer

Experience

Software Engineer – Thomsun Infocare , Kochi India.

September 2024 – present

- Contributed to the development of a robust trading and finance ERP software using Angular for the front-end and .NET for the back-end.
- Designed and implemented user-friendly interfaces to enhance client experience and operational efficiency.
- Optimized application performance and fixed critical bugs, ensuring timely project delivery.
- Actively participated in Agile (SCRUM) meetings and followed best practices in software development.
- Provided post-deployment support and implemented customer feedback for continuous improvement.

Software Engineer- Geojit Technologies , Kochi India. ***January 2022-June 2024***

- Wrote and developed new and well-tested code for different software projects
- Detail-oriented, organized and meticulous employee
- Works at a fast pace to meet tight deadlines
- Enthusiastic team player ready to contribute to company success and committed to achieving client success and satisfaction every step of the way.
- Experience in the Agile (SCRUM) Development Process

Projects

SPICE (Back-Office system for Geojit Financials) :

- Geojit is one of the largest trading firms in India. We are developing and maintaining a web application for the Geojit back office which is used by all branches of Geojit across India. There are 6 members on the team and I am working as a front-end developer on this project. The backend is developed using java services. The front-end is developed using Angular.

GLIME :

- Glime is a standalone web application within the back-office system SPICE. It is utilized to configure the client-side view, encompassing functionalities like payment gateways and confirmation.

SPARC (Back-Office system for Geojit Financials):

- SPARC is a web application for the Geojit back office which is used by all branches of Geojit across India. There are 12 members on the team and I am working as a front-end developer on this project. The backend is developed using java services. The front-end is developed using Angular 15.

GTL ASSIST :

- GTL Assist is a web application designed to automate various processes. Within Geojit, GTL Assist serves the purpose of downloading and processing trading exchange files. The team consists of three members, and my role in this project is that of a front-end developer. The backend functionalities are implemented through Java services, while the front-end is crafted using Angular 16 and implemented AD Login

SMARTFOLIOS :

- Smartfolios is a professionally managed, equity investment platform from Geojit Financial. This platform enables you to invest in the equity market utilising expert advice and well researched recommendations. The backend is developed using java services. The front- end is developed using Angular 7

USER QUERY BUILDER :

- The User Query Builder facilitates the generation of diverse reports from tables through simple user queries. Users can easily customize and structure their reports according to their preferences using the intuitive front-end view. The application's front end is developed using Angular 16 and implemented AD Login

Trading (ERP Trading Software) :

- Designed and developed front-end components using Angular for a seamless user experience
- Built and maintained back-end APIs using .NET for efficient data processing and integration
- Collaborated with a team of 6 members to ensure smooth development, testing, and deployment.
- Integrated core trading and financial modules, ensuring compliance with client requirements

Education

Diploma in Computer Engineering *July 2017- May 2020*

Government of Kerala Technical Education Department

- The Diploma in Computer Engineering program offered by Kerala Government Polytechnic is designed to provide students with a solid foundation in computer engineering principles and practical skills.

Skills

- Javascript
- Angular
- Typescript
- HTML
- CSS / SCSS
- .Net core
- Angular material
- Bootstrap
- PrimeNG
- NG-ZORRO
- MSSQL
- Syncfusion
